

--- "Series of 1868"- Division Open - *recess printed* Die Proof - 480 x 50 mm. design ---

The central engraved portion measures 143 mm. in length. The identical end portions measure 194 mm in length. The same diameter transfer roll would be used for making both dies, thus with ($c = \pi \times d$) the diameter of the transfer roll would be $194 / \pi = 6.15$ cm. or $6.15 / 2.54 = 2.42$ inches - probably a $2\frac{1}{2}$ inches diameter transfer roll.

recess printed in black ink on vertical mesh soft white proof paper - a separated 'Paste-up' die-proof
